

Daikin air conditioning  
technology

Experience year-round  
**Comfort** with Daikin

For every climate

# Air conditioning technology

Energy efficient and future-ready

If you're looking to heat and cool your home, all year round, look no further than Daikin's technology.

Our air-to-air heat pump technology can provide both heating and cooling for your home, allowing you to enjoy warmth when it's needed, and cool conditions when it's not.

The system is far more cost-effective than traditional electrical heating systems, and means you have one combined system that's working for you and your family 12 months a year, rather than separate, expensive alternatives.

## Efficiency and reduced impact

Powered by up to 80% renewable energy extracted from the air and 20% electricity, our air-to-air heat pumps use R32 refrigerant, which has low global warming potential, and are A+++ efficient, the highest rating on the market. So you can be sure you're doing all you can to minimise your impact on the planet.

## Fit for any home

Whether you're renovating your home or just want to inject a breath of fresh air into your existing one, a Daikin air-to-air heat pump is a logical solution for your cooling needs.

Our air-to-air heat pumps are easy to install and are ideal for replacing old electric systems. You might be looking for a solution suitable for a bedroom, a garden office or conservatory, or a system for your entire home. Whatever the case, our flexible units accommodate any floor plan – and the needs of your family, too.

## Save energy costs with our inverter technology

Daikin's signature inverter technology is an energy saving innovation that efficiently controls the motor speed of your unit, reducing energy consumption by up to 30%. Rather than using additional energy to start and stop as your room reaches the desired temperature, our inverter technology simply adjusts the speed of the motor – meaning it runs continuously and more efficiently in the long run.

It's just one of the reasons our air conditioning systems have A+++ energy efficiency ratings and satisfy all green building requirements.

# Daikin Emura

Cool, heat and purify your home

Meet the coolest design trend in air conditioning.

Now, you can cool, heat and purify using the Daikin Emura's revolutionary air-to-air heat pump technology. Available in white silver and black, our award-winning design is discreet and sleek, to suit houses of all styles.

## Your total climate solution

The Daikin Emura includes a two-area motion detection sensor, to direct and optimise your system's air flow for better performance. Able to intelligently detect when a room is empty, the Daikin Emura will automatically enable energy-saving mode to save you even more on your energy bills.

## A perfect fit for every household

Available for just one room, or up to as many as five, the choice is yours when it comes to creating a tailored home comfort solution. The Daikin Emura has been expertly designed to fit in seamlessly with your family life – whatever that might look like.

## A clean and healthy home

Airborne allergens such as dust and pollen, along with viruses, bacteria and even cigarette smoke are a thing of the past, with the Daikin Emura.

Its titanium apatite deodorising filter neutralises bothersome odours, while its silver allergen removal and air purifying filter eliminates harmful particles – for a home that's fresh and clean.

## Always in control

Download the Daikin Onecta app, connect your Daikin Emura to Wi-Fi and control your climate from anywhere. It's that easy.

Every **Emura** or **Stylish** air conditioning system comes with a wall mounted indoor unit, remote control and an outdoor unit

# Daikin Stylish

Innovation meets creativity

The Daikin Stylish is the latest addition to the Daikin air conditioning family, providing all you need from a premium climate solution.

The system's ultra-quiet fan delivers focused airflow, creating an even air and temperature distribution, while its humidifying and purifying properties mean your whole family can enjoy fresh, clean air.

If you're looking for a balance between function and aesthetics, the Daikin Stylish is your answer.

## Stylish by name and nature

Just as the name might suggest, our Stylish unit has won awards for its compact, innovative design, with curved corners and texture variations offering a sleek addition to any room.

Available in three colours – white, silver and black - our unit guarantees a flawless finish which fits with every interior.

## Intelligent humidity control

Because comfort isn't just about your indoor air quality or temperature; it's also about humidity. Moisture levels in the air can have a significant impact on our health and wellbeing.

Stylish uses a number of different settings to automatically and intelligently adjust its fan and compressors, creating a harmonious balance between temperature and humidity.

## Smart climate control wherever you go

You can manage the Stylish using your smartphone by downloading the Daikin Onecta app. So you can start creating your perfect climate in minutes.

- › One-room or full-home solutions available, with our split or multi-split system options
- › Integrated options, for in-built cooling and heating as you need it
- › Wall-mounted and available in a variety of finishes, for a discreet addition to your home

- › Individual room programming, for total family comfort
- › With world-leading energy efficiency and our low carbon Bluevolution™ technology, there's no need to compromise on your climate goals

# Ururu Sarara

The most advanced comfort system for your home

Ururu Sarara is Daikin's most complete air-to-air heat pump, offering five essential features in one sleek unit: heating, cooling, humidification, dehumidification, and air purification. Whatever the season, it creates the perfect indoor climate.

#### Your climate, your way

In winter, Ururu Sarara adds moisture to dry air for a warmer, more comfortable atmosphere. In summer, it removes excess humidity without overcooling. The result is year-round comfort with minimal energy use and maximum well-being.

#### Always fresh, always clean

This is the only residential system to combine fresh air ventilation with Daikin's powerful Flash Streamer technology. Together with automatic filter cleaning and a three-area motion sensor, it keeps air healthy and energy use low.

#### Smart control, simple comfort

Connect to the Daikin Onecta app to manage your climate anytime, from anywhere. It's the pinnacle of home air conditioning.

# Sensira

Essential comfort made affordable

Sensira brings reliable air conditioning and heating to your home in a sleek, compact design that delivers everyday comfort at a competitive price point.

#### Efficient by nature

Powered by Daikin's inverter technology, Sensira adjusts its output based on room temperature, helping you save energy without sacrificing comfort. With energy ratings up to A++, and ultra-quiet performance down to 20 dBA, it's the smart, simple solution for any room.

#### Cleaner, fresher air

Built-in filters tackle common allergens and odours, ensuring the air you breathe is always clean and healthy.

#### Easy to control from anywhere

Sensira comes with Wi-Fi capability as standard on most models, so you can adjust temperature, mode and schedules via the Onecta app or with your voice. Whether you're cooling a single space or upgrading an older system, Sensira is the reliable way to heat and cool your home efficiently.

# Perfera Wall & Floor Mounted

Total home comfort with powerful, silent performance

Designed to blend in and stand out, Daikin Perfera wall and floor-mounted units deliver outstanding heating and cooling performance with whisper-quiet operation and intelligent airflow.

#### Comfort tailored to you

Both versions feature Daikin's advanced Flash Streamer air purification, a silver allergen filter, and titanium deodorising technology. Wall-mounted units include 3D airflow and a two-area motion sensor for optimised comfort and efficiency. Floor-standing units offer dual airflow with unique heating features, including floor warming, heat boost, and heat plus.

#### Effortless energy savings

With seasonal efficiency up to A+++, Perfera keeps your comfort high and your bills low. Whether wall or floor-mounted, both models are ideal for renovations and can be used in multi-room setups.

#### Simple to control, easy to love

Adjust your climate using the app, voice assistants or remote control. With Perfera, the perfect indoor environment is always just a tap away.

# Comfora

Compact comfort with quiet confidence

Comfora is the stylish, space-saving wall-mounted unit that brings quiet, efficient heating and cooling to your home, without compromise.

#### Smart performance, sleek design

Its discreet, compact dimensions make Comfora ideal for above-door installation or where space is tight. Whisper-quiet operation down to 19 dBA means it works silently in the background, while energy ratings up to A++ keep running costs low.

#### Cleaner air, better sleep

Equipped with titanium apatite deodorising and silver allergen filters, Comfora helps remove odours, dust and pollen - ideal for allergy-prone households. The night set mode reduces light, sound and airflow for undisturbed sleep.

#### Control at your fingertips

Manage your system with the included remote, your smartphone via the Onecta app, or using voice assistants like Alexa or Google. With built-in Wi-Fi, Comfora offers comfort that's quiet, efficient, and always connected.

# Multi+ System

A single system for hot water, heating and cooling

Ultimate home climate control

Daily water heating

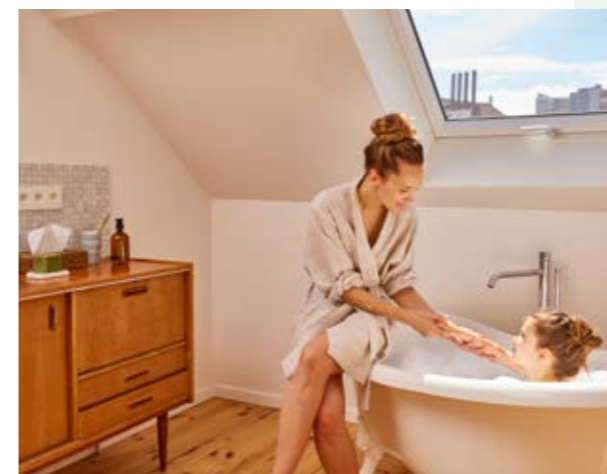

The domestic hot water tank heats up automatically – at a time of day when you are not using hot water or cooling. The scheduling function is worry-free. For instance, it can be programmed to start in the early morning or when you are normally at work.

Cooling plus for air conditioning

As domestic hot water is prepared according to the schedule (e.g. overnight), the outdoor unit can switch to cooling mode as soon as you activate an indoor unit. Keep your home cool and comfortable in the warmer months.

Comfort plus for more hot water

On days when you require more hot water than usual, the system can easily accommodate your needs. Activate the 'powerful' button on the domestic hot water tank. The water will be heated electrically and you can enjoy your cooling at the same time.

Heating plus for coldest days

Reliable heating and hot water on the colder days when you need it most. Both your water and your rooms are heated in a cost-effective way with this advanced, highly-efficient heat pump system.

The new Multi+ combines an air-to-air heat pump with a domestic hot water tank and your choice of indoor units to take care of heating, cooling and purifying the air. It uses Daikin's proven technology to create a comfortable home all year round while ensuring a plentiful supply of hot water – saving energy, and keeping running costs down.

Requiring minimal space, the Multi+ is quick and easy to install. It's an ideal replacement for domestic hot water systems, where air conditioning is also being installed.

State-of-the-art features include a fan design that reduces noise and power use and a high-efficiency swing compressor that continuously adjusts cooling and heating output. The system also features a weather-dependent setting, where the water temperature is determined automatically by the external temperature. A variety of indoor units, including wall-mounted, floor-standing, and concealed ceiling models, are available. Ideal for a wide range of small or mid-sized households, the Multi+ is the ultimate all-in-one solution.

- > The all-in-one solution for heating, cooling, and hot water
- > Year-round comfort
- > Lower energy bills
- > Unmatched efficiency
- > Simplified installation
- > User-friendly controls

## Is Multi+ the right solution for you?

Your current situation:

- > You are using an electric heater for hot water
- > Your heating system has high operating costs
- > You want cooling and heating for up to four rooms
- > Your household comprises up to five people.

If this applies to you, then the Multi+ system is the perfect solution. Replacing ineffective or outdated water heating systems in small or mid-size households with a modern heat pump solution saves energy and offers a high level of comfort.

# Control your home climate with ease

No more over-complicated programming. No more thermostat guesswork. We're world-leaders in designing intuitive, simple control systems. Creating your ambient home has never been easier.

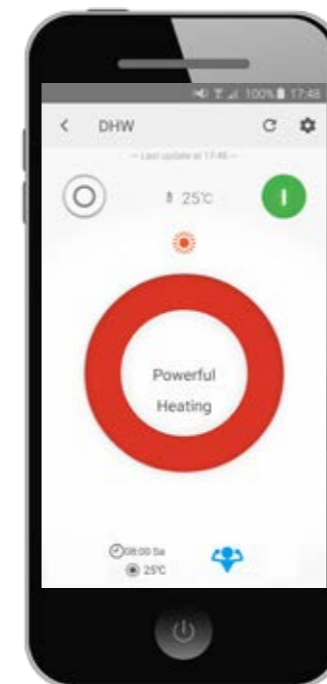

## Daikin controls

The sleek, stylish design of Daikin controls are only the beginning of their benefits. With a simple touch, you can access your home heating schedule, and additional controls are available via our complementary, easy-to-use smartphone app.\* Housed in a compact, wall-mounted unit, there's never been a better fit for home comfort.

- › **Range of colour options**, for a seamless fit with your interior
- › **Multiple award-winning** innovative design
- › **Daikin Eye technology** in selected controllers makes it easy to see how your system is performing, with its red and blue 'traffic light' system
- › Our newest heat pump models combined with the latest controls ensure your system is smart grid ready, when the energy network allows

# Power, without limits Daikin Onecta App

Now, you have the power to control your home environment, anywhere at any time. Simply connect your Daikin heating or air conditioning unit to your home Wi-Fi and download the Daikin Onecta App.\*

You can change and set your thermostat, create temperature schedules and review your energy consumption. It's year-round climate control in the palm of your hand.

- › **Set individual climates for separate rooms** for full family satisfaction
- › **Gain a complete overview of your home comfort system**, from its efficiency to its energy consumption
- › **'If this, then that'** programming options give you the power to make your own rules – for home comfort that suits your lifestyle

\* Unavailable with the Daikin Altherma hybrid system in bi-valent configuration.

# Make the move towards a cleaner, greener home

By choosing Daikin, you're choosing more than our world-leading technology. More than our commitment to innovation. Even more than high-powered home comfort for your family. You're choosing to lead the UK's renewable heat movement.
